

SUMMERVILLE

ATHENS, GEORGIA

Summerville is a 70-acre development in Athens, Georgia. Designed after historic traditional neighborhoods, Summerville includes a variety of single-family homes, townhouses, mansion flats, and commercial and civic spaces. Many of our house plans were chosen to set the precedent for the intended architectural style. We also designed townhouses and mansion flats for the high density areas of the master plan. In order to ensure that the initial vision for the project is successfully implemented we also put together a set of architectural guidelines. Architects, designers, and builders use the guidelines as a reference tool during all phases of both residential and commercial designing, planning, and construction.
